Every night Phillip goes to the top of the mountain and watches the stars with his big telescope.

He wants to be an astronaut one day.

He knows the map of the planets and stars by heart.

Suddenly he sees a shiny, round object in the sky. He wonders, 'What's this? I have never seen it before...'

He gets into his space car to investigate the case.

He takes the space highway and travels very, very fast!

He passes the enormous, orange sun
and beautiful, velvet moon.

Constantly he has the shiny, round object on his eye.
He is getting closer and closer.

Finally he reaches the object.

It is a large, round mirror!

The stars are holding the mirror and all the stars of the galactic reflect in the mirror,

they shine and sparkle.

Phillip sits in his space car, he stretches his hand to touch one of the stars in the mirror...

When he touches the star the mirror pulls him inside!
He is in another dimension, now he can fly
and move quickly in space.

He jumps from one star to another when suddenly
he sees a strange planet.
There are no creatures on the planet,
only wonderful flowers and trees.
He decides to make a bouquet for his mum Agnes.

Philip finishes the bouquet
and when he wants to move further...

It looks like a lion but it is much uglier.
He runs very fast to the mirror and the creature
runs after him!
When he almost gets to the mirror the lion catches Philip!

...he hears a noise
and behind the tree jumps out
a terrifying creature.

Suddenly Philip wakes up in his bed with scream....
He is horrified and his parents Agnes and Jonathan
come to his bedroom.

He tells them the whole story how he saw
the shiny object, that it was a mirror
and that he visited another planet and
a creature ran after him....

When he finishes he is calmer
but when he looks at the table,
near his bed, he can't believe it!

It's the bouquet he made
for his mum....

Exercise: Fill in the crossword.
